Candle-lite Launches Natural Wooden Wick Candles At the 2011 International Home and Housewares Show

Candle-lite continues to bring high quality, on-trend candle collections to the Food, Drug and Mass channels with the launch of a new candle collection featuring natural wooden wicks that crackle when they burn. These candles combine beautiful fragrances with the crackling sound of a fire creating a complete sensory experience.

Made in the U.S.A. by Candle-lite, the 7 oz. *Landscape* candle collection offers the ambiance and comfortable feeling that comes with the flicker of a flame and the crackling sound of a natural wooden wick. The *Landscape* collection, housed in cylindrical glass with a brushed metallic label, provides a style that will go with any home décor at a popular price point to encourage consumer trial. All *Landscape* fragrances are enhanced with essential oils.

The *Landscape* natural wooden wick candle collection will be featured in the Candle-lite booth S-4259 at the 2011 International Home and Housewares Show March 6-8 in Chicago, IL.

Candle-lite, a division of publicly traded Lancaster Colony Corporation (LANC), is recognized as a leader in the U.S. candle industry and has been manufacturing quality candles in the U.S.A. since 1840. Visit www.candle-lite.com for more information.
