

Harbor Industries, Inc. created this New Leaf Candle Display, an environmentally friendly unit created to promote Candle-Lite's eco-friendly New Leaf scented candles. The display is made of unfinished medium density fiberboard which is CARB Phase 1 compliant. The unit uses biscuits made of 100% recycled hardwood and water soluble glue. The graphics are digitally printed on "Green to the Core", a greener alternative, earth friendly, biodegradable rigid media. The display ships knocked down to minimize its carbon footprint. The display was designed to be easily disassembled and 100% recyclable at end of life. For more information, contact Harbor Industries, 14130 172nd Street, Grand Haven, MI 49417.

Outwater Plastic Industries offers its Natural Rolled Cork, a new line of environmentally friendly products. Cork has reestablished itself as a practical medium with which to work recognized for its durability and functionality as well as a green commodity that can be readily and repeatedly harvested from the bark of Cork Oak Trees. Outwater's Rolled Cork is naturally fire and flame spread retardant and easy to maintain. For more information, contact Outwater Plastics Industries, 24 River Road, Bogota, NJ 07603.

Nashville Display offers this Cracker Barrel Cookbook display which is constructed from all metal, so it is completely recyclable. The unit is 3 sided with 12 pockets. The ornamental wire floor display has a country look and a durable black textured powder finish. The display provided additional space for cookbooks and made consumer shopping and selection easier. For more information, contact Nashville Display, 306 Hartmann Drive, Lebanon, TN 37087.

Midway Displays, Inc. offers a flexible component system for hook & rotor displays developed for maximum merchandising options. Midway's exclusive nesting base system and patented Clipper "Snap Rack" Display "Packs Small, Does Big". The products have been developed to knock-down and pack smaller, saving customers money through lower freight, saving fuel costs. Whenever possible, recycled materials are used to manufacture components. For more information, contact Midway Displays, Inc., 6554 S.Austin Avenue, Bedford Park, IL 60838.
