Candle-lite Launches New Website

Cincinnati, OH, USA – July 2010 – Candle-lite, manufacturing quality candles in the USA since 1840, is pleased to announce the launch of a completely redesigned web site located at www.candle-lite.com. Candle-lite is a reliable source for a broad assortment of everyday and trend conscious home décor and fragrance products at affordable pricing without sacrificing quality or burn performance.

Designed as a source of inspiration and ease of navigation, the new site provides visitors with color, trend, fragrance and creative information. Three decorating galleries using decorative candles inspire with fresh and creative ideas for seasonal, everyday and holiday candle home décor. Brand new to the site is a "Trade Partners" section that communicates Candle-lite's efforts in the areas of sustainability, compliance and ongoing dedication to leadership in the candle industry.

The active online catalog features Candle-lite's complete offering of highly scented candle collections, including odor-neutralizing candles, eco-friendly candles, natural soy wax and unscented candles. The collections include all of the most popular candle forms – pillars, votives, tealights and jar candles.

Candle-lite is a division of Lancaster Colony (LANC).
